Foundational Knowledge

Foundational Knowledge refers to the knowledge that children need to be able to retrieve accurately and automatically in order to carry out complex tasks.

If we want to ensure that pupils are truly ready for the next stage in their education and lifelong success then we must ensure the foundations of learning are securely in place. We must build from "the bottom up." HFL.

Our learning environments play a key role in supporting and extending children's development. Continuous provision is the environment that has been created with defined spaces for children to use every day. This can be indoors or outdoors, with a range of purposeful resources that have been planned intentionally within each space to allow playing and exploring, active learning and creating and thinking critically.
